## Customer Reviews

Dr. Saeed Niku is a professor of Mechanical Engineering at California Polytechnic State University. His research interests include Mechanics, Machine Design, Biomechanics, Robotics, Creativity, and Design for the Disabled.

Although this book is really designed as an undergraduate textbook, it's premises are compelling enough that I purchased it as part of my own professional library. Well worth the cost.

I bought this text book as required material for a class. I am not a huge fan of textbooks but this one was very informative and easy to follow.

It arrived in great condition and the book is a very crucial part to my class. It helps us understand

product design and every aspect of it.

Great book learned an incredible amount.

I am in Professor Niku's class so I am required to read his book. This book is awfully written and quite pointless. Dont waste your money unless you are required to buy it for his class.
