Introduction To Nursing Research: Incorporating Evidence-Based Practice

Synopsis

Each new print copy includes Navigate 2 Advantage Access that unlocks a comprehensive and interactive eBook, student practice activities and assessments, a full suite of instructor resources, and learning analytics reporting tools. Introduction to Nursing Research: Incorporating Evidence-Based Practice, Fourth Edition is a distinct integration of evidence-based practice and research for the baccalaureate nursing student. The text focuses on how students can incorporate research into their daily practice while considering the newest trends and research. The Fourth Edition focuses on the meaning of evidence, the use of quality improvement, and the practical application of these aspects for the practicing healthcare provider. This is not a typical introduction to nursing research book; it is an evidence-based practice text that uses research. New to the Fourth Edition New chapter on quality Focus on new articles and research End of chapter quizzes Navigate 2 Advantage Access

Customer Reviews

This book was horrible and I have read my fair share of research books. The context drags on and on to explain things that shouldn't have. End of chapter questions were inconsistent with information provided in the chapters. Same questions from the newer edition had different answers that were also correct. The editors need to get their information straight. The more I read the more confused I get.

Horrible. Gives poor explanations and examples of concepts, hard to follow, painful to read. Difficult to take the explanations and examples given in the book and figure out how to apply them in practice.

Good condition rented and worked well for class!

Difficult to suffer through.

I just purchased this book and it is coming apart. I am in need of this book for my current classes, but wanted to pass it on to my daughter that will be taking the class next. I doubt we get to do that since it is already coming apart!

Nicely done

Exactly what I needed for my nursing class! Thanks for offering a great price.

Was great
