Customer Reviews

Really interesting, as Hadith are the interpretations on verses from the Qu'ran. So basically interpretations by Imans.

Excellent comprehensive guide to hadith.. Looking forward to reading and using it as a reference for years to comeEdit: after reading many other hadith books, i realized this one is very limited. The author does provide his own understanding, which is invaluable, but more hadeeth would have been nice. Also one thing i forgot to mention initially is that the arabic is hard to read (i bought it for the

english anyway). Plus layout could have been better and there are a few mistakes/inconsistencies. But i must reiterate, there are some very prominent hadeeth and presented in an order which makes sense and translation and explanation are good.

Bought the Kindle edition:Excellent

Great collection of ahadith!

I found this volume amazing. I had not realized all that went into prayer, or the incredible importance of cleanliness as practiced in a culture that began in a desert without an assured source of water for cleaning of all things. I learned so much for reading this book.

Still reading

Many of us only understand that there is just the Koran. There is also a Hadith which governs how Muslims behave which offers more insight into their culture. The book was in good condition and the contents are written side by side in arabic and english. Good addition to my library.
