Customer Reviews

Popular children's book author Wiese teaches kids fundamental science through simple activities related to spies and espionage. His engaging book contains 40 different scientifically-sound projects that are safe, easy to do, and require common household materials. Features such activities as writing in invisible ink, sending a message in Morse code, building a listening device, and visiting the CIA's home page on the Internet. Includes scores of delightful illustrations, dozens of ideas for "More Fun Stuff to Do" and "Spy Science in Action" sections which show kids how the scientific principles they've learned are involved in actual spying.

Sh-h-h-h-h-h!! Top Secret... Crack the code of superspy science fun! Make your own spy sunglasses Write messages with invisible ink Hook up a secret alarm, and much more! Discover how spies use science to keepâ "or uncoverâ "top secrets. Learn how to go under cover, master

Morse code, and even build devices to see and hear through walls! These and dozens of other fun-filled activities give you an inside look at the science behind spy gadgets and tricks of the trade. All the activities are completely safe and can be done with everyday stuff from around the house.

Kids can spend hours with this thing, and I think it is a great "toy" that is one heck of a lot better than the video games or whatever else electronic they seem to want to spend time on today. What I really like about this is it gets them to think, plan, and strategize as well as have a good time doing it. When things work out there are high fives all around or if it doesn't they go back and try a different strategy and approach - each time usually with a smile on their face and relaying back to the parent and their friends how great it was. If you are looking for a good activity for your kids this summer, this one should be on your list!

I think this book is great. The activities are just what I was looking for. I run a scout group and we were having a Secret Agent night so that's why I purchased the book. It gave us such great ideas for our program and the kids were able to pass off badges as well as have a heap of fun. The kids have asked for another Spy night and we'll have plenty of new ideas still to come from this book
Thanks

Great for a 9-12 boy or girl who loves "spy" tricks.

Bought for my grandson's birthday and he will love it! He is into the "spy" things now and this book has many activities for him to do and will keep him busy and hold his attention.

Great assortment of activities to entertain and challenge the children--got my brain going too!

Super fun book with brief history of spying, great crafts, for all ages.

Purchased as a Christmas gift - the kiddo will love this, and I love how it brings science into the games that he already enjoys playing. Can't wait for our experiments to start in the New Year!

My grandson loves it. Just be sure to tell the "Spy" to check in with "headquarters" (parents) to avoid any dangerous or embarrassing missions.
