# Sharia-ism Is Here: The Battle To Control Women; And Everyone Else

## Synopsis

Why hasn't Secretary of State Kerry banned, jailed and frozen assets of ISIS and Muslim Brotherhood leaders in USA as Dubai, Abu Dhabi, Saudi Arabia & Egypt are doing right now in their own countries?? Why are we sending intelligence & military expertise to fight ISIS, instead of simply cutting off extremist funding & Muslim Brotherhood leadership right here in America? How could our Commander-in-Chief, President Obama, possibly say that "The Islamic State (ISIS) is not Islamic". What is going on? ISIS in Syria is not our biggest problem. Radical Islam in AMERICA is our biggest problem, in its violent and non-violent forms. The political movement of Radical Islam, known as Sharia-ism is branching out across America seeking to over-rule our constitutional liberties to accommodate their fundamental version of Islam. And reporters, journalists, politicians, publishers, law enforcement & even our FBI must not question or criticize their actions lest they violate freedom of religion. Sharia-ism denies individual liberties and erodes secularism. And Sharia-ism is a lot more than simple terrorism. Just read these examples, which you will find in this book: On Sept 25 2014, a black former prison inmate who converted to radical Islam in U.S. prison, beheaded his fellow woman co-worker as he shouted Koranic verses at an Oklahoma food processing plant. In 2009, FBI director Robert Mueller himself stated that radical Muslim prison chaplains were converting 1 in 3 African American inmates in U.S Prisons to Radical Islam. Today, the U.S. Prison Dept. continues to work with this same "moderate" Muslim Brotherhood group to select chaplains. In 2012, the U.S. House Intelligent Committee flatly refused to investigate the Muslim Brotherhood in America, calling this request by fellow Congressmen, "insensitive" and discriminatory. Young American Muslim girls by the hundreds and possibly thousands are being sent on vacation each year during school breaks, to forcibly marry a strange relative. She returns as his "vacation bride" and sexual servant, and her fundamental Muslim husband applies for U.S. Citizenship. Faced with greater numbers of vacation brides, Germany & Great Britain have created special airport security teams to identify & protect suspected young victims, and shut down this pipeline of extremist new immigrant men. Where does religion end and politics begin? How can we protect freedom of religion and keep Americans and America safe? How are European Leaders drawing this line? This colorful, pocket sized, easy to read, Show N Tell Book explains what is going on in America. Each page is description of one of 60+ American or European news stories from 2008 to 2014, with a quote, photo, and context provided by over 75 experts. Women's rights activist and author, Joy Brighton, provides bullet point chapter summaries and green "insight boxes" to help readers connect the dots. This book is written for busy Americans who are concerned that

political correctness is backfiring in America. And, they have only 5 minutes while drinking their morning coffee to understand the real problem and be part of the solution. I am trying to get this book into hands of Congressmen. Your review will help. Thanks.

## Book Information

## Customer Reviews

Joy Brighton is a longtime champion of women's rights. Notably, in 1998, Joy partnered with SAVE THE CHILDREN to create one of the earliest micro-finance programs for women in Africa, and the first financial literacy course for women in Mozambique. Concerned about the abuse of women in America, sanctioned in the name of religion, culture or sharia, Joy published her first book: Sharia-ism is Here: The Battle to Control Women and Everyone Else, released April 2014. Joy is one of the few "women on the left" who understand that the threat of the No-Choice political movement of Sharia-ism is the women's rights issue of our time, right here in America. Joy Brighton is also a former Wall Street trader who today is part of an international team of experts concerned about the non-transparent risks of the Sharia Finance market, and threat to global free capital markets. A graduate of Columbia Business School in 1984, Joy was a fixed-income salesperson/trader for Lehman Brothers, and an adjunct Professor of Securities and Investments at various colleges. Later, as a graduate of Fordham University with a Masters in Psychological Counseling, Joy worked as an executive coach catering to investment professionals. Joy speaks with legal, policy, grass roots, and legislative leaders who are concerned about the challenge of Sharia-ism, the political movement of Radical Islam to: America's national security, civil and women's rights, First Amendment freedoms, sovereignty of U.S. Law and free capital financial markets. A good primer, if not an actual survival manual, in an easy to read format on the threat that Islamic sharia law is to America, and for that matter all non-Muslim countries. The insidious and stealthy imposition of Islamic sharia law is akin to a termite infestation eating away at our cultural foundations. It is thriving on our preoccupation with political correctness, which sharia infiltrators such as CAIR [Counsel on American Islamic Relations] are taking full advantage of. The Muslim Brotherhood's manifesto on how they plan to bring down the US from within states as much when they say they will do it "by their hands and the hands of the believers." The "by their hands" part seems to be working just fine. The media and the political class have completely abdicated their responsibility to inform and educate Americans to this very real threat, probably because they themselves have no clue about what is taking place right before their eyes. In the end it will be books like this that save the day. The thing about this situation that saddens and frustrates me to no end is that for the past dozen years we have been sending our troops to Afghanistan to defend and support a sharia compliant government. In this surreal struggle we are defending a sharia compliant government from sharia compliant insurgents. The only difference between the two is the degree of sharia each side is imposing. Our military strategists seem oblivious to this central fact, and won't even allow discussion of it. Our troops are losing their lives and limbs chasing after barely literate goat herders while the goat herders extremely articulate and public relations savvy brethren dressed in business suits are doing more to mute our unique Bill of Rights and to generally undermine our culture than al Qaeda and the Taliban could even dream about, and they are doing it with the full cooperation of the media, academia and even the White House which fetes them at iftar dinners. I sincerely hope this book becomes a best seller, and that the author follows up with additional works on this crucial subject.

It is a subtle switch by a liberal author who is at pains not to attack an entire religion but rather focus on an extreme element that has a lot of backing in the US and has the ear of many influential politicians. Joy Brighton wrote this book in a non traditional way, documenting specific cases where Shariaist's have weaved their way into the mainstream of America. She documents every case, and gives dates and persons involved in or critical of various shariah movements in the USA. She even documents those Muslims who have admitted to such extremism and have spent their lives to fight it, such as, Tarek Fatah, founder of the Muslim Canadian Congress and Manda Ervin, an a woman of Iranian origin who point to organizations such as CAIR who proclaim to defend the civil liberties of all American Muslims while working as a front group for the Muslim brotherhood and their Shariaist

sympathizers. The author also discusses the network of Shariaist, Muslim Brotherhood and Saudi funded groups in America, like the The MSA (Muslim Student associations) that exists on numerous college campuses. Groups like ISNA, AMC, WAMY, and HLF to name a few. But what I like about the Author is how on page 31 she tells us what Muslims are standing against Shariaism, at the very risk of their lives. Aside from the 2 people I mentioned above, other groups and individuals include; The American Islamic Forum for America, Writer Amir Taheri, Mufti Muhammedgali Khuzin, The Council for Democracy and Tolerance, and many many more. The author is taking the very liberal perspective by separating the wheat from the chaff so to speak. And by broaching this subject she has been shunned by the so-called liberals in the media who are complicit with Islamic extremism and bow to political correctness out of fear of being labeled a racist from the likes of CAIR. (as if Islam is a race) Having read about Islam, the Qur'an and the Hadith, I have been of the opinion that it isn't really about separating the good from the bad, but rather the oblivious from the devious. The devious are the Shariaists like CAIR who lie about Islam and its intentions, while the oblivious follow the 5 pillars of Islam and never delve deeply into the legalism that is a big part of the religion. In fact, the legal ramifications are mostly the result of the Hadith (words attributed to Muhammed by companions of the Prophet) which is rigorously defended by Sunni and Shia alike. (mostly Sunni) All the while, those Muslims like the Sufi's and the Ahmadiyya who delve more into the spiritual and charitable dimensions of religious life, are considered apostates and not real Muslims by many of these devious Shariaists. This book is a clarion call to all who consider themselves Muslims, to study the whole of their religion and decide whether they will confront the Shariahist supporters of terrorism, or defend them with their silence. Right now the non-Muslims are leading the fight and the oblivious are silent and afraid except for a few! Will you pretend to be victims of narrow-minded non-Muslim racists, or the devious Shariaist's masked as civil libertarians in CAIR and our federal government? The Politically correct liberals, Islamists and federal government are using the oblivious Muslims and non-Muslims alike to slowly implement Shariah law. Some states are fighting this as the Author notes at the end of the book. Its time to read this book and inform yourself on who the perpetrators are and how they are using us to push a dictatorial agenda of Shariah law

This easy to read book is current and names names. Anyone interested in learning the truth about how radical Islam is infiltrating American culture should read this book. Anyone who thinks it's politically incorrect to be critical of Islam Extremist (who don't label themselves as extremist) should examine the facts listed in this book. The book should be available in every library in the US and in all schools. The lessons being learned in Europe are real and destructive to those countries. This

text shows how it's done and what you can do to stop it from happening in the USA. This text is the first step towards an educated position on radical islam.

Ms. Brighton presents all you need to know about Sharia and its impact on our freedoms in a concise PowerPoint format. She also lists the blatant failures of government representatives to address the Sharia encroachment on our freedoms of speech, press, and assembly. The hero of the book is Louisiana Governor Bobby Jindal who has signed six laws to derail Sharia in his state. When one considers that Muslims represent only 2% of Americans, but file about 25% of the religious discrimination claims, one realizes that we are up against a determined and aggressive force. Will America reach the point now seen in Great Britain where young girls have to hide spoons in their underwear to tip off airport security officials that they are being abducted into a forced marriage in a foreign country? Women -- both Muslim and non-Muslim -- are rising up to denounce Sharia Law, but more Americans are needed to join the "battle".

This is an easy-to-read, show and tell book that is loaded with documented facts about Islam in the United States and Europe, the threats it poses to freedom, and steps individuals and governments are taking to stem radicalism.
