Once you start using the guide itself you will find plenty of very easy to read sketch charts as well as aerial land and sea photographs. and in each geographical cruising section suggestions on not only the best way to enter an area but also what you can expect to find once you are at anchor. Island listings begin from The North and run South which is the way most cruisers will be doing it making it almost a quite simple to find the next port of call, and the convenient 6" x 9" size and spiral (lay flat) binding make it helm friendly while underway.

Customer Reviews

I run a Yacht Towing and assist vessel for Bradford Marine, Bahamas. I use your guide and others along with paper charts and a chart plotter. Day or Night I go through many tight areas towing barges and other vessels. Your guide is great reading on a tow at 5 kts. Ive been reading it for 20 years. It's convenient 6" x 9" size making for ideal underway helm use and the heavy duty binding insures durability. Detailed listings and contact information for Marinas, cruising facilities is a plus.

--Mike Stafford, Grand Bahama, BahamasI have used their guide since 1976. It is indispensable. Since my last addition was about 2000, I think it was time to replace it. --John StricklandI have used this guide since 1976. It is indispensable. Since my last edition was 2000, I think it was time to replace it --John Strickland

The old YG's were for real adventurers. These newer editions are for big power boaters who wouldn't be venturing away from their local waters without the advent of GPS. Ads for marinas feature photos of super yachts...that tells the story. If you are a serious cruiser, don't waste your money. Buy the Explorer Charts.

Includes local information that can come in handy. The charts are okay - just not enough detail and are to be used information only

Great for cruising to islands.

Yes this book is everything I expected

great
