Customer Reviews

While it has some interesting things concerning the CIA it doesn't even compare to "Spy the Lie," which is why I bought the book in the first place.

Useful for convincing obstinate children and surly waitresses to do your bidding.

It is an old declassified interrogation manual which was again declassified in 2014. It is outmoded. You can get it for free online.

It's 60 pages of a 120 page manualBut I would still say it's a good purchaseCovers personality types

Great read gives you insights into how people react.

good

I don't have any comparison to this.

I was asked to read and review this "Document", and that's just what it is, a Document. The US Government suddenly became aware that we were way behind in the field of Mind Control and Interrogation, compared to the Russians, the North Koreans, and the Chinese. And so, created a Dept in the CIA, with orders to catch up with and overtake, the above mentioned countries. This Document was one of the Guidelines that the CIA came up with, and although, as you can see has been "declassified", much of it has still been "blacked out". If you have ever read or looked at declassified documents, you will have come across this before. I have read about and studied this "field", and knew what the blacked out words were in reference to. Much of what is in this document has been, and still is being used, but has been expanded upon. Be careful discussing this with people, as it is a very touchy subject, and may cause some people to back away from you. It is not for everyone.
