Easy-to-Make Pop-Ups (Dover Origami Papercraft)

Synopsis

If you've ever seen a pop-up book or card, you know how much fun they can be: figures come alive by rushing out toward you; arms wave, mouths open and close, and animals leap back and forth! With the help of this easy-to-follow book, you'll soon be creating lots of entertaining projects — from a simple pop-up valentine, an opening flower, a moving trapeze, and a fire-breathing dragon, to your own pop-up zoo. Step-by-step instructions, accompanied by helpful black-and-white line drawings, show how to create folds, layers, coils, springs, tab mechanisms, and revolving wheels. There are more than 30 projects to choose from — and no patterns to trace or photocopy. (All you'll need are common materials such as paper, glue, scissors, ruler, pencils, and crayons.) Loaded with ideas for birthday cards, gifts, school projects, and more, this handy book offers great ideas for three-dimensional fun.

A good learning tool. This book isn't fancy with pretty colored pictures or completed projects, but the diagrams are really good and easy to follow. The format is geared for teaching kids, so it's really good for a beginner like me :) This is one of my better investments for pop up books so far. You can't beat the price and you'll learn a lot.

A lot of stuff going on in this book..needed a book to teach pop ups to adult classes, however, these are a little more complicated than I wanted, although they are cute!

A wonderful book for anyone who wants to learn pop-up basics. Great for kids and adults.

Grandson loves this book.

We bought this book to help our daughter with a 4th grade pop-up project. It is full of great ideas and the directions are easy to follow. We had fun making the pop-ups together. I would highly recommend this title -- it's not just for kids, but easily used by crafty kids approximately ages 8 and up.

Great user-friendly book for kids! Love the step-by-step!

I used this book for my kids when they were homeschooling. I must have loaned it out, and decided to purchase it again. Easy pop-ups to make along with a few more advanced. These develop imagination and entertain for hours.
