## Customer Reviews

OK, transcriptions need a bit of thinking out, they are not as well written as the Hal Leonard ones. easy to play and Green Day songs are good fun

Nice book

the tab makes learning faster and easier. in the back of the book it explains how to use the tab.

This is got to be the worst Green Day bass tab book out there. When they made this book they obviously were not trying to tab it out accurately on how Mike Dirnt actually plays his bass parts. I found looking through this book a lot of missing bass fills and wrong notes. Also, the song selection could have been better. I mean come on, why do we need a bass tab for Good Riddance when there's no bass in the song? Cast Away or even 2000 Light Years Away would have been better

choices. The only way i would recommand this book is for a guideline to help you tab out Mikes bass parts for yourself because your going to be doing that anyways when you realize how bad the tabs are.
