Let's Review Math B (Let's Review Series)

Synopsis

This brand-new addition to Barron's Let's Review Series conforms to the new Regents Math B curriculum taught in secondary schools throughout New York State. This book gives an in-depth review of all Math B topics, provides graphing calculator instruction at the keystroke level, and presents hundreds of questions with answers for guided practice and review. Actual Math B Regents Exams with answers are at the back of the book.

Customer Reviews

An ideal companion to high school mathematics textbooks, this volume covers all topics prescribed by the New York State Board of Regents for Math B. For Students: Easy-to-read topic summaries, step-by-step demonstration examples, what you need to know about graphing calculators, glossary of Math B terms, hundreds of questions with answers for practice and review, in-depth Regents exam preparation, including actual Regents exams with answers. For Teachers: A valuable lesson-planning aid, a helpful source of practice and test questions.

Generally, this was a great book. Each section was elaborate, and provided several questions of which you can assess your knowledge. Along with a couple of Math B regents exams, this book provides a solid base for someone to build upon. Up until now, the Math B course really is not even in existence in most areas, but for projects of higher math, such as a math paper, this book gives you

everything you need for Seq. 2ac to Seq.3...Of course, you have the applications etcetra, which this book combines with the solid algebra 2. Great review book, and it fulfills its purpose for a 5 out of 5
